Fetal-type gastrointestinal adenocarcinoma: a morphologically distinct entity with unfavourable prognosis.

A morphological and molecular study of proposed early forms of traditional serrated adenoma.
Bettington M, Rosty C, Whitehall V, Leggett B, McKeone D, Pearson SA, Walker N.

Oncogenic BRAF mutation induces DNA methylation changes in a murine model for human serrated colorectal neoplasia.

The role of APC in WNT pathway activation in serrated neoplasia.

Ferroportin Expression in Adipocytes Does Not Contribute to Iron Homeostasis or Metabolic Responses to a High Calorie Diet.

Granulomas in the gastrointestinal tract: deciphering the Pandora’s box.
Brown I, Kumarasinghe MP.
Risk of colorectal cancer for carriers of a germ-line mutation in POLE or POLD1.

Correction: Risk of colorectal cancer for carriers of a germ-line mutation in POLE or POLD1.

Data set for the reporting of intrahepatic cholangiocarcinoma, perihilar cholangiocarcinoma and hepatocellular carcinoma: recommendations from the International Collaboration on Cancer Reporting (ICCR).

Gastroenteropancreatic neuroendocrine neoplasms: selected pathology review and molecular updates.
Chai SM, Brown IS, Kumarasinghe MP.

Gastric pyloric gland adenoma: a multicentre clinicopathological study of 67 cases.

Somatic mutations of the coding microsatellites within the beta-2-microglobulin gene in mismatch repair-deficient colorectal cancers and adenomas.
Fam Cancer. 2018 Jan;17(1):91-100.

Pathologic Features of Hereditary Cholestatic Diseases.
Clouston AD.

Genomic Characterization of Upper-Tract Urothelial Carcinoma in Patients With Lynch Syndrome.
RNF43 is mutated less frequently in Lynch Syndrome compared with sporadic microsatellite unstable colorectal cancers.

MLH1-93 G/a polymorphism is associated with MLH1 promoter methylation and protein loss in dysplastic sessile serrated adenomas with BRAF<sup>V600E</sup> mutation.

A critical role for donor-derived IL-22 in cutaneous chronic GVHD.

Associations of alcohol intake, smoking, physical activity and obesity with survival following colorectal cancer diagnosis by stage, anatomic site and tumor molecular subtype.

Are Enterocolic Mucosal Mast Cell Aggregates Clinically Relevant in Patients Without Suspected or Established Systemic Mastocytosis?

Assessing the ProMCol classifier as a prognostic marker for non-metastatic colorectal cancer within the Melbourne Collaborative Cohort Study.

Tumor budding and human chorionic gonadotropin-β expression correlate with unfavorable patient outcome in colorectal carcinoma.
Chorionic Gonadotropin-β Modulates Epithelial-Mesenchymal Transition in Colorectal Carcinoma Metastasis.

The phrase NIFTP accentuates, rather than resolves, the current issues with thyroid neoplasia classification.
Liu C.
Hum Pathol. 2018 Sep;79:222.

CpG Island Methylation in Sessile Serrated Adenomas Increases With Age, Indicating Lower Risk of Malignancy in Young Patients.
Liu C, Bettington ML, Walker NI, Dwine J, Hartel GF, Leggett BA, Whitehall VLJ.

Polycythemia Rubra Vera: Where Does the Truth Lie?
Low IW, John Harley HA, Clouston A.

Immunomodulatory liposomes targeting liver macrophages arrest progression of nonalcoholic steatohepatitis.
Metabolism. 2018 Jan;78:80-94.

Subclassification of hepatocellular adenomas: practical considerations in the implementation of the Bordeaux criteria.
Miller GC, Campbell CM, Manoharan B, Bryant R, Cavallucci D, O'Rourke N, Clouston AD.

Underappreciation of non-alcoholic fatty liver disease by primary care clinicians: limited awareness of surrogate markers of fibrosis.
A Pragmatic Approach Identifies a High Rate of Nonalcoholic Fatty Liver Disease With Advanced Fibrosis in Diabetes Clinics and At-Risk Populations in Primary Care.

Controlled attenuation parameter in NAFLD identifies risk of suboptimal glycaemic and metabolic control.

Hepatic expression profiling identifies steatosis-independent and steatosis-driven advanced fibrosis genes.

The role of macrophages in the development of biliary injury in a lipopolysaccharide-aggravated hepatic ischaemia-reperfusion model.
Biochim Biophys Acta Mol Basis Dis. 2018 Apr;1864(4 Pt B):1284-1292

The Role of the Surgical Pathologist in the Diagnosis of Gastrointestinal Polyposis Syndromes.
Rosty C.

Improved relapse-free survival on aromatase inhibitors in breast cancer is associated with interaction between oestrogen receptor-a and progesterone receptor-b.
Cancer Risks for PMS2-Associated Lynch Syndrome.

Autoimmune enteropathies.

Umetsu SE, Brown I, Langner C, Lauwers GY.

Recipient mucosal-associated invariant T cells control GVHD within the colon.
